

Viledon Plug-on Gasket

- Made of a U-shaped metal carrier profile and a closed-pore rubber jacketing with integral sealing lips and hollow compartment; colour: black.
- Can be fitted without tools simply by pressing the gasket onto the metal edge.
- The gasket is kept in place by the clamping effect of the rubber lips. Adhesive or special fixing agents are not required.
- The Viledon plug-on gasket is weatherproof and thermally stable within a range from approx. - 40°C to + 100°C. Very resistant against alcohol, alkaline solutions and light acids and also extremely long-lasting.
- Highly flexible and silicone-free.

Installation Instruction

- ▶ Begin assembly in the middle of one side – not in a corner!
- ▶ Fit the gasket onto the mounting frame with the hollow compartment facing inwards.
- ▶ Form the corners completely, without overstretching the gasket.
- ▶ Continue fitting the gasket until you reach the starting point.
- ▶ Check the correct position of the gasket before cutting to length.
- ▶ Cut the gasket to length with a right-angled cut, leaving an overlength of approx. 5 mm, and join the two ends together.
